

Pergola awning

markilux pergola compact

The graceful awning system that can be used as sun and wet weather protection for the patio – highly modern design with an appealing, square cassette.

Product Characteristics

Wind resistance class 3
Beaufort 6 → 38–48 km/h → 10.5–13.4 m/s → 24–30 mph

1) face fixture depicted by way of example

2) manufacture with square or round posts

3) adjustable post ¹⁾ manual or motor-driven

4) shadeplus¹⁾, manual operation, during extension

5) LED-Line in the cassette ¹⁾

6) combination of LED-Line and LED-Spots ¹⁾

7) footplate cover standard

7) support post with stabilisation box ¹⁾

8) wall sealing profile ¹⁾

1) Optional accessories

Product Characteristics

Description

- awning system with lateral guide tracks resting on posts at the front, making an extension of 4 meters possible and the shading of up to 18 m² with a single awning. Thanks to the tracfix cover guidance system, the sophisticated and reliable tensioning technology and its sturdy construction, the system can be used up to Beaufort 6 (wind resistance class 3).

Special features

- fully encompassing cassette that protects the cover perfectly
- tried-and-tested tensioning system with drive belts and integrated gas pistons – delivers optimum cover tension – in any phase of extension
- with tracfix system, the continuous lateral cover guidance system that leaves no gap between the cover and guide tracks – gives improved wind stability and a cleaner appearance
- various lighting combinations available: LED Line in the guide tracks, LED Line in the cassette or LED Spots attached to the cassette, LED Line in the lighting bar or LED Spots fitted to the lighting bar – individually configurable lighting options which provide a pleasant atmosphere in the evening
- a shadeplus with a height of 210 is optional - integrated vertical sun and privacy protection in the front profile, manually operated
- an optional telescopic post, manually operated, ensures water drainage, even at the low minimum pitch of 8°
- support posts optionally round or square, incl. screw-on footplates or ballast boxes for versatile installation
- can be combined perfectly with the markilux syncra, the vertical roller blinds markilux 776 tracfix, markilux 876 tracfix and the side screen markilux 790

Dimensions

- fixture width 72–450 cm, maximum extension 400 cm
- maximum width x extension: 455.4 × 400 cm
- intermediate sizes are available

Roller tube and lateral bearings

- round roller tube Ø 85 mm with keyway, galvanised steel – excellent stability, ensures near perfect cover performance even at the largest widths
- the roller tube bearing is made of stainless steel

Awning profiles

- extruded aluminium, in façade quality, powder coated
- cassette profile in two pieces, square, height × depth 125 mm × 125 mm
- guide tracks angular, rounded edges, width × depth 52 mm × 52 mm
- front profile rounded at the front, depth × height 110 mm × 52 mm, shadeplus profile depth × height 139 mm × 66 mm

End caps

- the cassette end caps are made of die-cast aluminium, in two parts, powder coated
- the guide track end caps are made of high-quality plastic, powder coated

Fixture brackets and support posts

- extruded aluminium, powder coated
- cassette brackets: face fixture, top fixture, eaves fixture
- posts square 70 × 70 mm or round Ø 70 mm, standard height 250 cm, intermediate heights up to a maximum of 300 cm are available, fixed posts with footplate min. 36 cm and with a ballast box min. 60 cm in height, telescopic posts with footplate min. 157 cm and with ballast box min. 198 cm in height
- screw-on footplate 200 × 200 mm
- footplate cover 212 × 212 mm in one piece, height 48 mm, is made of die-cast aluminium, corners rounded
- a version of the support posts with optional ballast box 600 × 600 mm × 525 mm (w×d×h), for versatile installation is available

N.B! For additional information and configuration options, please refer to the chapters “General Information” and “markilux Optional- Accessories” in the sales manual “Designer Awnings for Conservatories, Glass Canopies and Windows”.

Frame colours

markilux frame colours without surcharge

traffic white, RAL 9016

metallic aluminium, RAL 9006

grey brown, similar to RAL 8019

off-white textured finish, 5233 ¹⁾

stone grey metallic, 5215 ¹⁾

anthracite metallic, 5204 ¹⁾

havana brown textured finish, 5229 ¹⁾

Non-standard powder-coated finish

Bespoke frame colours incur a surcharge – matt, metallic, finely textured and pearl finishes as well as other colour ranges (DB, Tiger etc.) on request. All frame colours are available at a surcharge with enhanced corrosion protection.

Colours may differ slightly from those depicted in both hue and finish.

¹⁾ textured finish

1) Shadeplus cover is narrower than the awning cover

N = Seamless

QN = Horizontal seam(s)

Only available in plain seamless fabrics (oversized, fabric width > 120 cm) or in plains with a horizontal joint (fabric width 120 cm)

N.B! Covers made from fabrics 120 cm wide will have a horizontal joint!

As a result, a fabric with a textured or flecked pattern will take on an appearance different from that of the awning cover if made from the same fabric.

markilux shadeplus

Tips for selecting a shadeplus fabric

Ideally, a shadeplus cover should be made **seamlessly** or with horizontal panels (the cover then has a **horizontal seam**) in order to achieve the best result.

Seamless fabric qualities are: sunvas oversized material and transolair series 338.. Fabric qualities with a horizontal seam are: plain fabrics from the sunsilk, sunvas, sunbow collections and transolair series 339.. as well as from the Soltis Perform 92 series.

Owing to the small winding diameter, the rolling up characteristics and the resulting visual appearance of the cover, shadeplus covers made with vertical seams are not recommended.

Lighting options

Lighting options

- 1 LED-Line in the cassette ¹⁾
- 2 LED-Spots attached to the cassette ¹⁾
- 3 LED-Spots in the cover support tube ²⁾
- 4 LED-Line in the cover support tube ²⁾
- 5 LED-Line attached to the guide tracks

For combination possibilities please view section
“Dimension overview lighting options”

- 1) cannot be combined with each other
- 2) cannot be combined with each other

Controls

dimensions in mm

Dimension overview with the various lighting options

Option 6: LED-Spots in the cassette (can be combined at will with options 1–5), electronic components in an E box or in the cover support tube

Option 7: LED-Line in the cassette (can be combined at will with options 1–5), electronic components in an E box or in the cover support tube

* = standard dimension

BB = order width

E-box = see "E-box"

H = order dimension = extension

Y = order dimension = distance from post centre to leading edge of front profile.

Dimensions: min. 100 bis max. 1000 mm (standard)

Lighting options

LED-Line attached to the guide tracks

E-box **M**
71850.
BB = **500** mm

E-box **G**
71873.
BB = **700** mm

LED-Spots attached to the cassette or
LED-Line recessed into the cassette

E-box **M**
71850.
BB = **500** mm

E-box **M**
71850.
BB = **500** mm

LED-Line below the guide tracks
and LED spots attached to or
LED-Line recessed into the cassette

E-box **G**
71873.
BB = **700** mm

E-box **L**
71874.
BB = **1200** mm

individual use

E-box **I**
71851.
BB = **to order**

BB = order width
VB = adjustment range

dimensions in mm

Combination options

Example with markilux 776 tracfix / 876 tracfix (optionally with panorama window)

Vertical cassette blind at the front

Vertical cassette blind at the front, support posts with stabilisation boxes

Installation of a vertical cassette blind both to the side

Installation of a vertical cassette blind at the side and obligatory cross member between support posts

N.B! A vertical roller blind may only be installed at the side or the front if a stabilizing profile (VP) has been fitted. A front vertical cassette blind must always be mounted under the guide tracks (see fig. 1)

The combination of markilux pergola compact with vertical cassette blinds is only permitted if two fixed posts are used.

Combination Possibilities

- markilux 790 at the side (cover optionally with angled top edge)
- markilux 790 at the front between support posts
- markilux pergola compact fitted to the markilux syncra
- additional combinations may be possible on request.

Picture 1)

72203. = post fixture guide track (round post)
 78548. = flat track bracket
 78719. = additional angled bracket for the bearing, gearbox and motor sides
 787211 = accessories for two angled brackets
 BK = stabilisation boxes (600 × 600 × 525 mm)

- F3 = concrete footing
 VP = cross member
 ● = round post
 ■ = square post

Calculation of the approximate fixture height, examples

Example 1: front support posts pushed as far forward as possible, $Y = 100$ mm

ES	= 100
W	= 15°
H	= 6000
WS	= 5800
Y	= 100
SH	= 2500
AHS	= 1620
AH	= SH + AHS = 2500 + 1620 = 4120

Example 2: front support posts pushed back, $100 \text{ mm} \leq Y \leq 1000 \text{ mm}$

ES	= 700
W	= 15°
H	= 6000
WS	= 5200
Y	= 700
HD	= 130
SH	= 2500
AHS	= 1620
AH	= SH + AHS - HD = 2500 + 1620 - 130 = 3990

ES = centre of post to the \leftrightarrow leading edge of the front profile
W = pitch
H = extension

WS = measurement from the wall \leftrightarrow post
Y = distance from post centre to leading edge of front profile
HD = difference from the fixture height

SH = support post height 2500 mm
AHS = fixture height from the top edge of the post
AH = installation height

dimensions in mm

Calculation of the approximate fixture height

Drawing template

N.B! An on-line tool to calculate the installation measurements can be found in the protected area of the website, pro.markilux.com.
