

Pergola awning

markilux pergola cubic

Sun and wet weather protection for large areas -
created in a clean and timeless design.

Product Characteristics

Wind resistance class 3

Beaufort 6 → 38–48 km/h → 10.5–13.4 m/s → 24–30 mph

1 manufacture with square or round posts

2 adjustable post ¹⁾ manual or motor-driven

3 shadeplus, during extension ¹⁾

4 solar module sundrive, radio-controlled drop valance operation ¹⁾

LED-Line fitted to the guide track and cover support tube ¹⁾

combination of LED-Line and LED-Spots ¹⁾

support post with stabilisation box ¹⁾

5 footplate cover standard

6 wall sealing profile ¹⁾

¹⁾ Optional accessories

Product Characteristics

Description

- the awning system on slender posts and with lateral guide tracks provides generous shade with an extension of up to 6 metres and for areas up to 30 m² using a single unit. Thanks to the tracfix cover guidance system, the sophisticated tensioning technology and its sturdy construction, the system can be used up to Beaufort 6 (wind resistance class 3)

Special features

- fully encompassing cassette that protects the cover perfectly
- tried-and-tested tensioning system with drive belts and integrated gas pistons – delivers optimum cover tension – in any phase of extension
- with tracfix system, the continuous lateral cover guidance system that leaves no gap between the cover and guide tracks
- option of adding a shadeplus – vertical protection against low-lying sun, wind and inquisitive glances integrated into the front profile, can be operated manually or solar driven by radio remote control (433 MHz)
- various lighting combinations are available: lighting strip LED Line in the guide tracks, LED Line in the cover support tube or LED Spots fitted to the cover support tube – individually configurable lighting options providing a pleasant atmosphere in the evening
- an optional telescopic post, operated either manually or by motor, ensures optimum water drainage during rain, even at the low minimum pitch of 7°
- support posts optionally round or square, incl. screw-on footplates or ballast boxes for versatile installation
- can be combined perfectly with the awning systems markilux syncra, the vertical roller blinds markilux 876 tracfix, markilux 776 tracfix and the side screen, markilux 790

Dimensions

- single unit: 73–600 cm in width, maximum extension 600 cm (depending on the width)
- maximum dimensions width × extension: 500 × 600 cm / 550 × 500 cm / 600 × 450 cm
- coupled units up to 5 fields wide are available
- intermediate sizes are available

Roller tube and lateral bearings

- round roller tube Ø 95 mm with keyway, galvanised steel – excellent stability, ensures near perfect cover performance even at the largest widths
- the roller tube bearing is made of die-cast aluminium

Awning profiles

- extruded aluminium, in façade quality, powder coated
- cassette profile in two pieces, angular, height × depth 160 mm × 200 mm
- angular guide tracks, width × height, 60 mm × 70 mm (coupling guide track 116 × 70 mm)
- front profile rounded at the front, depth × height 150 mm × 70 mm

End caps

- the cassette end caps with opening for guide tracks are made of die-cast aluminium, powder coated
- the maintenance covers on the cassette are made of die-cast aluminium, powder coated
- guide track end caps made of die-cast aluminium, powder coated

Fixture brackets and support posts

- extruded aluminium, powder coated
- cassette brackets: face fixture, top fixture, eaves fixture
- support post round Ø 70 mm or square 70 × 70 mm, standard height 250 cm, heights up to 300 cm are available
- screw-on footplate 200 × 200 mm
- footplate cover 212 × 212 mm in one piece, height 48 mm, is made of die-cast aluminium, corners rounded
- a version of the support posts with optional stabilisation box 600 × 600 mm × 525 mm (w×d×h), for versatile installation is available

Note: Additional information and accessory options can be found in the chapters “General information” and “markilux Accessories” in the sales manual “Designer Awnings for Conservatories, Glass Canopies and Windows”.

Frame colours

markilux frame colours without surcharge

traffic white, RAL 9016

metallic aluminium, RAL 9006

grey brown, similar to RAL 8019

off-white textured finish, 5233 ¹⁾

stone grey metallic, 5215 ¹⁾

anthracite metallic, 5204 ¹⁾

havana brown textured finish, 5229 ¹⁾

Non-standard powder-coated finish

Bespoke frame colours incur a surcharge – matt, metallic, finely textured and pearl finishes as well as other colour ranges (DB, Tiger etc.) on request. All frame colours are available at a surcharge with enhanced corrosion protection.

Colours may differ slightly from those depicted in both hue and finish.

¹⁾ textured finish

1) 60 cm 2) 120 cm 3) 84 cm

4) 88,5 cm

5) In the case of striped patterns, a symmetrical pattern repeat at every second seam is not possible.

Coupled awnings

2–5 fields, 1 motor per field
alternatively 2 fields 1 motor / 3 fields 2 motors / 4 fields 2 motors
maximum size per field: see “single unit” dimensions

General notes

Different field extensions are available in a coupled awning. The rolling up behaviour of the covers may vary in coupled awnings that have different field sizes. This does not effect the functionality of the awning or shorten the service life of the covers.

The option of having telescopic posts in awnings with 3–5 fields is only available on request.

Drop valance ^{1) 2)}	standard	optional
height 230 cm (crank handle, depending on the fabric series chosen)		
height 230 cm (motor operation, depending on the fabric series chosen)

automatic controls (light, wind, rain)

Important background information can be found in the chapter
“Optional Accessories” in the sales manual “Designer Awnings for
Conservatories, Glass Canopies and Windows”

1) / 2) LED-Line and LED-Spots cannot be combined

3) Only available for single unit and coupled unit 2 fields

markilux shadeplus

Tips for selecting a shadeplus fabric

Ideally, a shadeplus cover should be made **seamlessly** or with horizontal panels (the cover then has a **horizontal seam**) in order to achieve the best result.

Seamless fabric qualities are: sunvas oversized material and transolair series 338.. Fabric qualities with a horizontal seam are: plain fabrics from the sunsilk, sunvas, sunbow collections and transolair series 339.. as well as from the Soltis Perform 92 series.

Owing to the small winding diameter, the rolling up characteristics and the resulting visual appearance of the cover, shadeplus covers made with vertical seams are not recommended.

Shadeplus / drop valance with radio-controlled motor RTS ^{4) 5)}

Shadeplus fabric	fabric pattern no.	standard	optional	awning fixture width	height	tailored cloth
sunvas	301.. / 309..-315..	✓	—	≤ 600 ≤ 600	160 230	LN QN

Serge 600	272..	—	—			

4) 433 MHz radio-controlled RTS motor powered by a sundrive solar panel, minimum fixture width 94 cm

5) only available in plain seamless fabrics (oversized, fabric width > 120 cm) or in plains with a horizontal joint (fabric width 120 cm)
Uni-fabric pattern recommended

N = seamless

LN = vertical panel joints, panel width approx. 60 cm

QN = horizontal panel joint(s)

Telescopic, motor-driven post

- minimum post height: 1970 mm
- motor cable, black
- the LED-Line profiles are always fitted to all guide tracks of the markilux pergola to give a harmonious look
- the awning may only be retracted or extended if the front profile is horizontal, in other words, the post must not be in the lowered position
- the shadeplus (optional) may only be operated when the post is not in the lowered position. It may only be operated when the front profile is horizontal

Controls	standard	optional
hard-wired motor	✓	—
radio receiver Somfy Slim Plug io (8271254)	—	✓
radio receiver Universal Slim Receiver RTS Plug (8272148)	—	✓

Technical details Hard-wired motor

power supply	230 V AC
power output	110 W
protection class	IP 44

Y = **order dimension** = distance from post centre to leading edge of front profile.
 Dimensions: min. 100 bis max. 1000 mm (standard)

Note: In the case of a motorised post, the difference in measurement from the end of the profile cable duct / LED-Line to end of extension = Y + 120 mm = depending on the Y value between 22 cm and 112 cm (in the case of the LED-Line and standard post, the difference in measurement is = Y + 50 mm = depending on the Y value between 15 cm and 105 cm, please also take a look at Dimension overview lighting options).

dimensions in mm

01 Overview of fixture dimensions, shadeplus

Magnetic gearbox operation

with magnetic gearbox attachment for manual operation of the drop valance
lengths: standard 120 cm, optional 160 cm, from 160 cm up to 280 cm on request
order no. 74271

* = extension when retracted

Please note! The shadeplus (optional) may only be operated when the post is not in the lowered position. It may only be operated when the front profile is horizontal.

sundrive

Solar module for radio-controlled drop valance operation

Technical data solar module

voltage	max. 21 VDC
current	max. 196 mA
power output	3,2 W
protection class	IP 44
battery capacity	2200 mAh

Technical data radio-controlled motor RTS 433 MHz

power supply	12 V DC
power output	26 W
protection class	IP 44

dimensions in mm

Dimension overview with the various lighting options

Option 1: LED-Line in the guide tracks, electronic components in an E-box

* = standard dimension

60585. = cassette bracket E-box

H = **order dimension** = projection

E-box = see E-box for the electronics

Y = **order dimension** = distance from post centre to leading edge of front profile

Option 2: LED-Line in the cover support tube, electronic components in the cover support tube

Option 3: LED-Line in the cover support tube and in the guide tracks, electronic components in the cover support tube

* = standard dimension

H = **order dimension** = projection

V = distance from the rear of the cassette to the centre of the cover support tube. Standard: centred ($V = H \div 2$). Bespoke dimensions are available on request. Dimensions: min. = 700 mm, max. = 1590 mm

Y = **order dimension** = distance from post centre to leading edge of front profile

dimensions in mm

Option 5: LED Spots attached to the lighting bar and LED Line under the guide tracks, electronics in the lighting bar

Option 7: LED Line in the cassette (can be combined with options 1-5), electronics in an E-box or in the lighting bar

- * = standard dimension
H = **order dimension** = projection
V = distance from the rear of the cassette to the centre of the cover support tube. Standard: centred ($V = H \div 2$).
 Bespoke dimensions are available on request. Dimensions: min. = 700 mm, max. = 1590 mm
Y = **order dimension** = distance from post centre to leading edge of front profile

dimensions in mm

E-box for the electronics

In units without cover support tube

Dimension overview E-box

Minimum E-box dimensions

Wireless technology	433 RTS MHz		868 MHz io	
Extension H [cm]	< 330 cm	≥ 330 cm	< 330 cm	≥ 330 cm

Lighting options

LED-Line attached to the Guide tracks	E-box M 71850. BB = 500 mm	E-box G 71873. BB = 700 mm	E-box M 71850. BB = 500 mm

for independent use

E-box I
71851.
BB = to order

- * = standard dimension
- 60585. = cassette bracket E-box
- BB = order width
- E-box = in sizes M, G or I

- H = order dimension = projection
 - VB = adjustment range
 - Y = order dimension = possible indent dimension of support post
- dimensions in mm

Combination options

Example with markilux 776 tracfix / 876 tracfix (optionally with panorama window)

vertical cassette blind at the front

Vertical cassette blind at the front, support posts with stabilisation boxes

Installation of a vertical cassette blind both to the side

Installation of a vertical cassette blind at the side and obligatory cross member between support posts

N.B! A vertical roller blind may only be installed at the side or the front if a stabilizing profile (VP) has been fitted. A front vertical cassette blind must always be mounted under the guide tracks (see fig. 1)

The combination of markilux pergola classic with vertical cassette blinds is only permitted if two fixed posts are used.

Combination Possibilities

- markilux 790 at the side (cover optionally with angled top edge)
- markilux 790 at the front between support posts
- markilux pergola fitted to the markilux syncra
- additional combinations may be possible on request

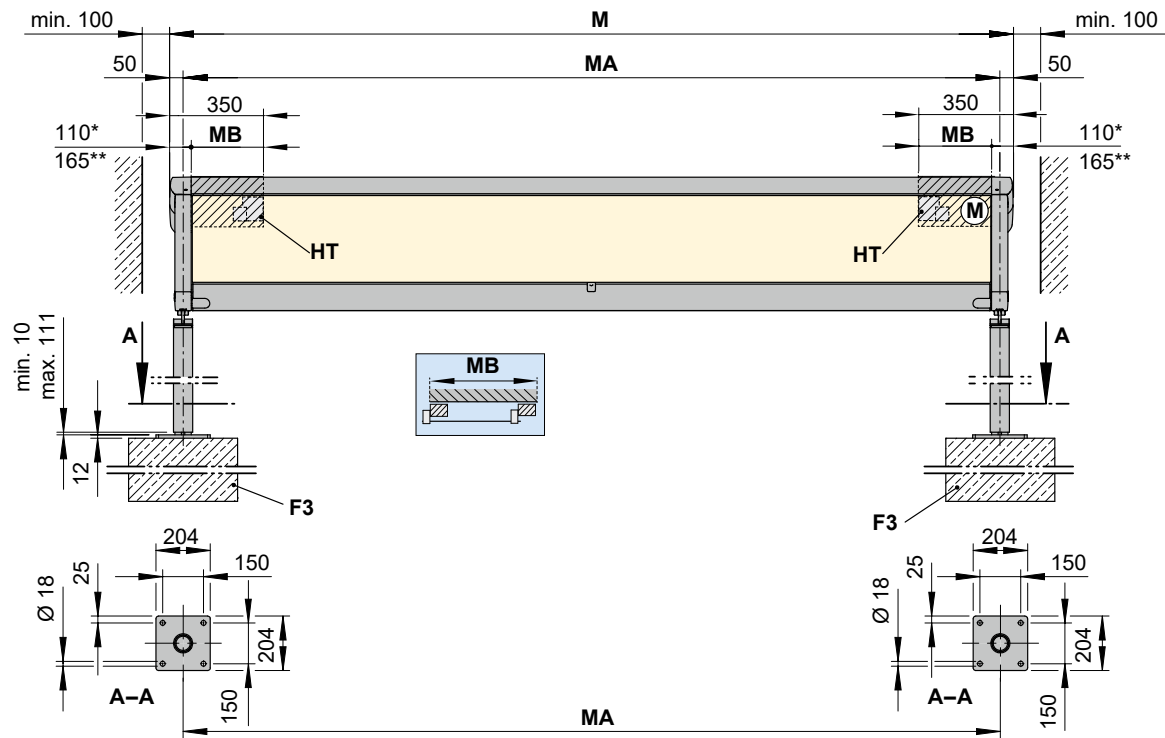

Picture 1)

- 72203. = post fixture guide track (round post)
- 78548. = flat track bracket
- 78719. = additional angled bracket for the bearing, gearbox and motor sides
- 787211 = accessories for two angled brackets

- BK = stabilisation boxes (600 × 600 × 525 mm)
- F3 = concrete footing
- VP = cross member
- = round post
- = square post

Overview of dimensions

Reveal fixture

N.B.! In the case of reveal fixture a distance of at least 100 mm must be left free on each side of the awning.

- * = dimensions fixture range
- ** = dimensions fixture range for cable duct in case of lighting
- F3 = concrete foundation. Please refer to the section "Concrete foundations"
- HT = bracket
- (M) = overall awning width = $MA + 10$ cm
- M = operation side, motor drive
- MA = **order dimension**= awning fixture width = fixture width
- MB = bracket fixture range

dimensions in mm

Motor cable exit point ¹⁾

1) depending on the operation side, left or right

76734. = support post round with double track bracket

76432. = support post round with double track bracket

* = dimensions fixture range

** = dimensions fixture range for cable duct in case of lighting

BA = width between fixture points

EA = single unit

M = overall awning width = MA + 10 cm

MA = **order dimension** = awning fixture width = fixture width

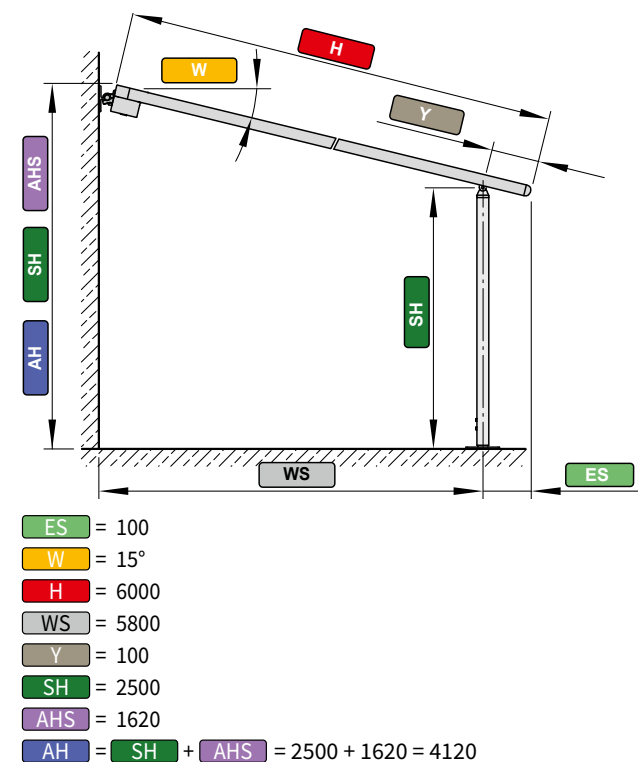

MB = bracket fixture range

SH = support post height

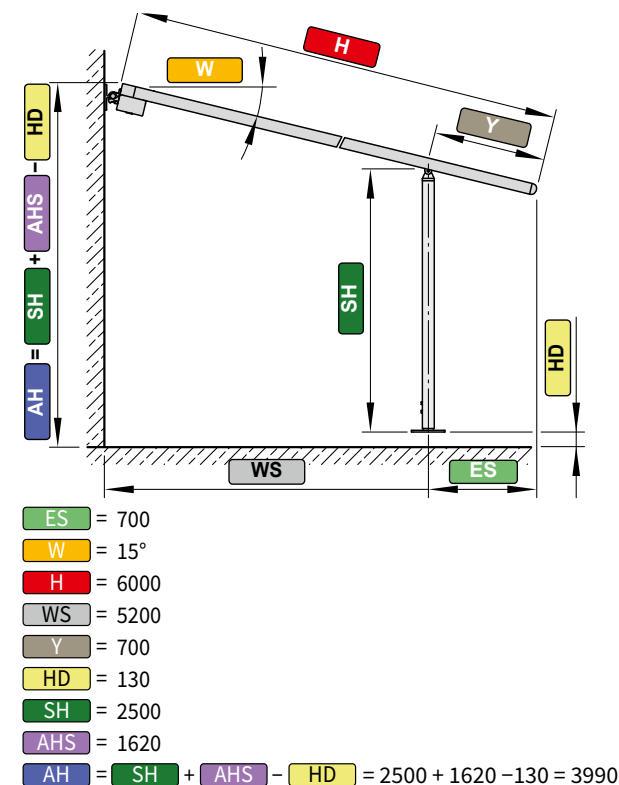

dimensions in mm

Calculation of the approximate fixture height, examples

Example 1: front support posts pushed as far forward as possible, $Y = 100$ mm

Example 2: front support posts pushed back, $100 \text{ mm} \leq Y \leq 1000 \text{ mm}$

ES = centre of support post to the \leftrightarrow leading edge of the front profile

W = pitch

H = extension

WS = measurement from the wall \leftrightarrow support post

Y = distance front support posts can be moved back

HD = difference from the fixture height

SH = support post height 2500 mm

AHS = fixture height from the top edge of the support post

AH = installation height

dimensions in mm

Calculation of the approximate fixture height

Drawing template

N.B! An on-line tool to calculate the installation measurements can be found in the protected area of the website, pro.markilux.com.
